Dengue Serology

Test Name	Result	Unit	Normal Range	Flag
Dengue NS1 Antigen (Rapid)	NEGATIVE	—	Negative	
Dengue IgM Antibody	NEGATIVE	—	Negative	
Dengue IgG Antibody	NEGATIVE	—	Negative	

Remarks / Interpretation:

1. WBC count is within normal range; slight neutrophilia noted — consistent with early viral/bacterial infection. 2. Dengue NS1 and antibodies are NEGATIVE. If symptoms persist beyond Day 5, repeat NS1 and CBC. 3. PCV marginally low — may reflect mild haemodilution from fever. Recommend clinical correlation. 4. Results should be interpreted in conjunction with clinical findings.
